

Creating a Dual Diploma Program

Increase Student Recruitment and Retention by Offering a Simple Dual

For many international students looking to study at U.S. colleges and universities they will discover there are some obstacles when it comes to the enrollment process as an international student. International schools with students who have interest in enrolling in a U.S. college can reduce these obstacles by offering an accredited U.S. diploma through Citizens' High School in conjunction with their own diploma. Below we will show the benefits and how easy this process is.

Benefits

No Extra Time

The beauty of the dual diploma program is that students will complete in the same time frame as they would in a standard diploma program. The courses can be taken in one year or spread out through out their high school career.

Affordable

CHS offers a very affordable tuition rate. Since students will only be taking 6 courses with us it makes a US diploma very affordable.

Increase Recruitment

With the increase enrollment of international students at U.S. colleges, students are looking for schools that can best assist them in achieving their goal of getting into a U.S. college.

Increased Value

This program utilizes your current courses for 75% of the program. CHS will review and grant credit for those courses which increases the value of your program.

Steps to Creating Your Dual Diploma Program

- Step 1:** Send over the course names, descriptions, and course outcomes of 18 courses that you wish all of your students to complete. CHS will review the courses and ensure we can accept the courses as transfer credit.
- Step 2:** CHS will send you a list of courses for students to select from to complete their mandatory 6 courses, as well as ensure that students are completing their graduation requirements for both schools and will have a transcript that will be accepted at most U.S. colleges and universities.
- Step 3:** Your institution will decide when the students will take the courses needed. Also CHS will provide you marketing materials to help you advertise this new program.
