

BENEFITS OF A

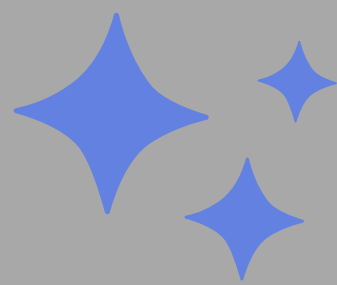

U.S. DUAL DIPLOMA

While it may seem initially that this program would hurt the local school, it is actually the opposite. The Dual Diploma program provides a wealth of benefits to the local school and its students, such as:

INCREASED VALUE

By offering both a local diploma and an accredited U.S. diploma the local school is able to increase the value of the school to local students and parents.

LARGER COURSE CATALOG

With access to over 300 online courses the school will be able to increase the number of courses that it is able to offer to students whether they are in the program or not.

BILINGUAL PROGRAM

With all of our courses presented in both English and the students native language, students can use the program to increase their proficiency in English, while at the same time earning an American diploma.

U.S. COLLEGE ADMISSIONS ASSISTANCE

In partnership with Education Abroad we assist students in earning admissions into one of over two dozen prestigious U.S. colleges and universities.

EASY MONITORING

CHS will provide the school with back-end access allowing them to easily track the progress and grades of their students and receive custom reports.
