

Dual Diploma and Its Benefits for International Students

For many students, studying in the United States or in Europe may seem like a distant dream. However, with improvements in international connectivity, dual diploma options, and reduction in Visa regulations that dream is no longer so distant.

Below are just some of the benefits that students receive in the Dual Diploma program:

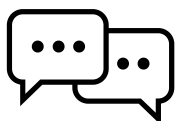

No Extra Time in High School

The key benefit of the CHS Dual Diploma program is that you can complete it at the same time you are completing your local diploma. Your graduation date with both schools will be the same day.

Reduces the cost of earning a U.S. Diploma

Earning an online American diploma or coming to the U.S. to earn one can cost a family tens of thousands of dollars. By utilizing the CHS dual diploma program you will spend a fraction of that price for the same product and services.

Improved English Language Acquisition

CHS provides bilingual courses in the core subject areas so that students can learn in both English and their native language while they continue to improve their English language skills.

Easier U.S. college admissions

By having an accredited U.S. diploma with a school that works with dozens of U.S. colleges, you will have an easier time of being accepted and transitioning to learning in the U.S.

Global Exposure

CHS has students and affiliates in 5 different continents and over two dozen countries. Additionally, we have an international conversations course where students get to interact with other students from around the globe.

When choosing an American high school to earn your high school diploma from, make sure you look for one that is flexible to match your interest and goals and provides all of the services you need at an affordable price.
